Amendments to the Claims:

1-38. (canceled)

39. (currently amended) An isolated polypeptide having at least 80% amino acid sequence identity to:

(a) the amino acid sequence of the polypeptide shown in Figure 326 (SEQ ID NO:294);

(b) the amino acid sequence of the polypeptide shown in Figure 326 (SEQ ID NO:294), lacking its associated signal peptide;

(c) the amino acid sequence of the extracellular domain of the polypeptide shown in Figure 326 (SEQ ID NO:294); or

(d) the amino acid sequence of the polypeptide encoded by the full-length coding sequence of the cDNA deposited under ATCC accession number 209489,

wherein said polypeptide induces an ~~immune or~~ inflammatory response.

40. (currently amended) The isolated polypeptide of Claim 39 having at least 85% amino acid sequence identity to:

(a) the amino acid sequence of the polypeptide shown in Figure 326 (SEQ ID NO:294);

(b) the amino acid sequence of the polypeptide shown in Figure 326 (SEQ ID NO:294), lacking its associated signal peptide;

(c) the amino acid sequence of the extracellular domain of the polypeptide shown in Figure 326 (SEQ ID NO:294); or

(d) the amino acid sequence of the polypeptide encoded by the full-length coding sequence of the cDNA deposited under ATCC accession number 209489,

wherein said polypeptide induces an ~~immune or~~ inflammatory response.

41. (currently amended) The isolated polypeptide of Claim 39 having at least 90% amino acid sequence identity to:

(a) the amino acid sequence of the polypeptide shown in Figure 326 (SEQ ID NO:294);
